SUMMARY

Detail-oriented Data Analyst skilled in SQL, Python, Excel, Power BI, EDA, statistical modeling, feature engineering, machine learning. Experienced in building dashboards, cleaning and transforming data, and developing predictive models to support business decisions.

EDUCATION

Bachelor of Computer Application (BCA)

2022-2025

J H Patel Institute of Management and Technology, Davangere, Karnataka

Pre-university Course

2020-2022

G M Institute of Technology, Davangere, Karnataka

SKILLS

- **Programming & Data Analysis:** Python, Pandas, NumPy, exploratory data analysis, data cleaning, data transformation, statistical analysis and predictive modeling
- **Database:** SQL, joins, sub queries, aggregate functions, CTEs, window functions and data extraction
- **Business Intelligence:** PowerBI, dashboard development, data visualization, KPI reporting, DAX, Power Query and data modeling
- **Microsoft Excel:** PivotTables, lookup functions, conditional formulas, charts, data cleaning and reporting
- **Machine Learning:** Regression, classification, feature engineering, model evaluation, Scikit-learn, Random Forest and XG Boost

PROJECTS

- **Nike VS Adidas Sales Analysis Dashboard | PowerBI ([GitHub Link](#))**
Analyzed Nike and Adidas product performance across prices, ratings, discounts, reviews, brands and product segments using Power BI. Developed KPI cards and interactive visualizations for price comparison, discount analysis, product distribution and the top 10 highest-priced products. Implemented DAX measures and dynamic brand and price-segment slicers to support business-focused comparisons.
- **E-Commerce Delivery Performance Analysis | PowerBI ([GitHubLink](#))**
Evaluated 100K order records across JioMart, SwiggyInstamart, and Blinkit to compare delivery efficiency, order value, service quality, delays, refunds, and customer feedback. Leveraged Power Query and DAX to transform order-level data and derive platform-wise KPIs, delivery-time segments, on-time delivery rates. Combined category-level analysis, delivery distributions, KPI comparisons, and interactive filters for performance monitoring.
- **Apple Products Price Prediction | Python, Machine Learning ([GitHubLink](#))**
Regression problem statement, Collected the data from Kaggle. Performed feature engineering, feature selection, exploratory data analysis, Compared the results given by various Machine Learning models. Best R2_ score given by Random Forest Regressor which is equal to 38.46.
- **Wal-Mart Multi-Store Sales Analysis ([GitHubLink](#))**
Classifying multi-store Wal-Mart sales data using SQL. Used filtering, aggregation, GROUPBY, HAVING, joins, Common Table Expressions (CTEs), and window functions to analyze store-wise sales, product performance, customer trends, and key business metrics. Identified sales patterns and performance trends across multiple stores to generate meaningful business insights and support data-driven decision-making.
